## VST Connect Pro 4.0.30.230 – Public Beta

---

### Improvements and issues addressed

The following table lists all issues that have been addressed in this version.

Area	Issue
Performer	VST Connect Performer no longer shows a blank screen.
Performer	Adding another Performer track now works reliably.
Recording	Recording with VST Connect now works reliably.
Support	Logitech c920 cameras now work reliably.
Stability	Operating Get HD files locally no longer freezes the application.
Other	The ID button in VST Connect no longer disappears.
Others	Cue mix and monitor outputs no longer produce noise when used with a buffer size higher than 512 samples. When using a smaller buffer size, ASIO-Guard must be turned off.
