# Padshop 1.2.10

---

## Improvements

The following lists all improvements in Padshop 1.2.10

ID #	Issue
New feature	AAX support allows to run Padshop in Pro Tools.
New feature	High DPI mode can be deactivated on Windows systems for hosts having issues with high-resolution monitors or mixed multi-monitor setups.
New feature	The graphical user interface received a facelift in different areas.
New feature	We added Previous/Next switches in the program slot.
New feature	Polyphonic Key Mode allows to start and end one and the same note multiple times independently. If activated, ending one of the notes will not end the others.
HALLY-7494	Improved envelope parameter adjustment via mousewheel.

## Padshop 1.1.20

---

### Improvements & issues resolved

The following table lists all issues that have been resolved and the improvements in this version.

Issue
Installer is now fully Yosemite compatible.
Fixed plug-in UI issues on Retina displays.

## Padshop 1.1.0

---

July 2012

The 1.1.0 update adds VST 2 host application support for Windows 7 and AU host application support for Mac OS X versions 10.6 and 10.7 (32 bit and 64 bit).

You can find the free update patchers here:
