## Version history

April 2019

Steinberg Media Technologies GmbH

## Padshop 1.2.20

---

The following lists all improvements in Padshop 1.2.20

ID #	Issue
HALLY-7724	Fixed an issue in which sometime the wrong preset got loaded.
HALLY-7722	Fixed: Root key was not saved in program / project.
HALLY-7593	Fixed: Polyphonic Key Mode could produce hanging notes.

## Padshop 1.2.10

---

### Improvements

The following lists all improvements in Padshop 1.2.10

ID #	Issue
New feature	AAX support allows to run Padshop in Pro Tools.
New feature	High DPI mode can be deactivated on Windows systems for hosts having issues with high-resolution monitors or mixed multi-monitor setups.
New feature	The graphical user interface received a facelift in different areas.
New feature	We added Previous/Next switches in the program slot.
New feature	Polyphonic Key Mode allows to start and end one and the same note multiple times independently. If activated, ending one of the notes will not end the others.
HALLY-7494	Improved envelope parameter adjustment via mousewheel.
