SpectraLayers 8.0.20

March 2022

This version contains the following improvements and issue resolutions.

Issues resolved

Issue
SpectraLayers 8.0.20 now offers native Apple Silicon support.
An issue has been resolved where merging a layer into another layer with inverted phase would not work as expected.
Performing audio modifications when no layers are selected in ARA mode no longer renders the application unreliable.
An issue has been resolved where a blank dialog would appear behind the Noise and EQ registration progress bar when applied to long selections.

SpectraLayers 8.0.10

July 2021

This version contains the following improvements and issue resolutions.

Issues resolved

Issue
A signature error for the AAX plug-in has been fixed (macOS only).
Duplicating layers is not possible in ARA mode. Now a warning message will appear when trying to perform this action.
Spanish strings for EQ Match and Ambiance Match have been corrected.
When hovering over the frequency scale the scroll bar now shows up properly.
Menu entries are no longer blocked when working on full screen mode or maximized mode with the taskbar hidden (Windows only).
Keyboard input now works as expected after applying a VST plug-in on either standalone or ARA mode (macOS only).
