WaveLab Cast 1.1.30

February 2022

This version contains the following improvements and issue resolutions.

Issues resolved

ID #	Issue
P-5540	Rendering multiple tracks with effects no longer causes a rare error.
P-5506	Markers are now always copied when rendering a single audio montage track.
P-5505	The "Play Through Master Section" option in the Master Section now works as expected.
P-5501	Loudness Range boundaries in the Global Analysis dialog are available again.
P-5499	An issue has been resolved where certain WAV files could not be opened.
P-5494	Overwriting an existing recording no longer renders the application unreliable.
P-5491	The peak meter in the Master Level pane of the Master Section is now displayed correctly when the "Bypass Master Section" option is activated.
P-5489	Using the "Multiple Copies" option to paste the copied content in the Audio Editor now works as intended.
P-5397	An issue has been resolved where in some occasions the "Range of Active Video Clip" option was disabled.
P-5479	Adjusting volume faders in the Master Section and the Inspector has been improved.
P-5467	An alignment issue with the command buttons on the plug-in header when using the plug-in chain mode has been resolved.
P-5463	Dragging a marker in the Audio Montage window now shows a vertical guideline.
P-5543	Renaming a file that has been exported from Cubase no longer renders the application unreliable.
