

SpectraLayers Pro 9

SpectraLayers Elements 9

Version history

April 2023

Steinberg Media Technologies GmbH

SpectraLayers 9.0.20

April 2023

This version contains the following improvements and issue resolutions.

Issues resolved

Issue
Transferring large audio clips from Reaper to SpectraLayers in ARA mode no longer renders the application unreliable.
It is now possible to remove SpectraLayers as an ARA extension while the About dialog is open.
When duplicating projects, layers no longer go missing or get mixed up.
Using selection tools in ARA mode when no layer is active no longer renders the application unreliable.
Insert/delete/crop time for a range selection that starts before the beginning of the timeline no longer causes timing issues.
Selections are no longer canceled when moving the mouse over UI areas that are covered by a dialog box (macOs only).
Making the extension permanent in ARA mode no longer renders the application unreliable.

SpectraLayers 9.0.10

July 2022

This version contains the following improvements and issue resolutions.

Issues resolved

Issue
Generate Tone and Generate Noise now work as expected when using the new Mix mode.
EQ Match now works faster and uses the correct match ratio.
VST 3 processes no longer cause audio artifacts when applied to a selection.
