

# VST Expression Maps

## for the Vienna Symphonic Library Special Edition PLUS

### Introduction

For using the contained VST Expression Maps, **Cubase 5.0.1 or higher** is required.

- You can add VST Expression Maps to existing projects by opening the VST Expression Map editor, then importing the desired map(s) - left column - and load a matching map into each instrument track or MIDI track (from the Cubase 5 track inspector).

- Integrate VST Expression Maps to existing track presets or create new track presets (instrument or MIDI tracks). This way, a sound can be loaded as a complete channel strip including the Expression Map and other settings. Track Presets can be conveniently managed in the Cubase 5 MediaBay.
- Include VST Expression Maps in project templates and update your existing project templates with VST Expression Maps. Unused maps can still be loaded in the VST Expression Map Editor for later use.

# List of included Expression Maps

**VSL SE+ - Violins, Violas, Celli.** Works with the following matrices:

01S Solo Violin +  
02S Solo viola +  
03S Solo cello +

# Closing words

We hope that this introduction was helpful during your first steps with VST Expression and our Vienna Instruments presets and Expression Maps!

If you're not familiar with the Vienna Instruments and Vienna Ensemble, or just want to make sure, please have a look at the Vienna Instruments and Vienna Ensemble manuals and the video tutorials in your [User Area](#)! And if they don't provide the information you need, feel free to post your questions at <http://vsl.co.at/forum>, or send an e-mail to [support@vsl.co.at](mailto:support@vsl.co.at).

4

We wish you a good time with the Vienna Instruments and the VST Expression Maps!

Your Vienna Symphonic Library Team

## **Update version 1.1:**

The Expression map **VSL SE+ - Violins, Violas, Celli** now includes the articulation « con sordino ». It is combinable with the staccato and tremolo articulations.
