

VST Expression Maps for the Vienna Symphonic Choir

Introduction

For using the contained VST Expression Maps, **Cubase 5.0.1 or higher** is required.

- You can add VST Expression Maps to existing projects by opening the VST Expression Map editor, then importing the desired map(s) – left column – and load a matching map into each instrument track or MIDI track (from the Cubase 5 track inspector).

- Integrate VST Expression Maps to existing track presets or create new track presets (instrument or MIDI tracks). This way, a sound can be loaded as a complete channel strip including the Expression Map and other settings. Track Presets can be conveniently managed in the Cubase 5 MediaBay.
- Include VST Expression Maps in project templates and update your existing project templates with VST Expression Maps. Unused maps can still be loaded in the VST Expression Map Editor for later use.

List of included Expression Maps

Vienna Choir. Works with the following matrices:

- 11 Sopran Choir Basic - AA
