Steinberg Media Technologies GmbH

VST Connect Pro 5.5.10

July 2021

This version contains the following improvements and issue resolutions.

Improvements

- ADR support in Connect is now only visible and usable for officially supported & compatible Nuendo versions, which are Nuendo 10.3.10 and Nuendo 11.0.20 & up.
- Knob mode is now supported in Connect and Performer.
- Notification is added for not supported video track functionality within the VST Connect Trial version.
- Added Talkback Channel option to Performer.
- Sound that appears when the online status of a contact updates is now mutable.

Issues resolved

Area	Issue
Performer	Fixed missing Audio Device control panel in Performer on Windows.
Performer	Fixed changeable (clickable) status notification in VST Connect which only represents the status information of the Performer.
Performer	Fixed swapped functionality of Performer knob mode setting.
Performer	Fixed lost audio connection setting after restarting Performer.
Performer	Fixed sporadically frozen webcam picture or UI within Performer.
Performer	Fixed sporadically continued video stream (e.g., TimeCode overlay) in Performer when Playback was stopped.
Get HD	Fixed incorrect Mute state of audio recording after Get HD audio file transfer.
Get HD	Fixed incorrect status/replacement of recorded audio file after a Get HD audio file transfer was stopped or interrupted and finished the transfer afterwards.
Get HD	Fixed wrongly shown "Busy" status information when the Get HD audio file transfer was already finished.

Get HD	Get HD files transfer of recordings from different connections now works as expected.
Video Setup	Fixed UI glitch in Connect Video Setup page.
ADR	Fixed not correct scaled Dialogue overlay size in Connect and Performer.
ADR	Fixed no functional ADR recording when MIDI track is additionally in use.
ADR	Fixed ADR Swipe video overlay execution after initially set of the corresponding setting.
Video Playback	Fixed video playback inserted additional frames before the Pre-Roll time.
Video Playback	Fixed ignored video file offset in Cubase/Nuendo.
Performance	Fixed potential Stop of recording after several minutes.
Other	Fixed swapped Left/Right View after restarting Cubase/Nuendo and loading corresponding project.

VST Connect Pro 5.5

April 2021

This version contains the following improvements and issue resolutions.

New Functionality

- Share video (Screen sharing) in each direction (from Connect to Performer and from Performer to Connect) – for both Cubase & Nuendo users.
- Full Nuendo ADR functionality support including video overlays as Swipes, Countdown, Dialogue, etc. as well as individual signal switching for ADR Modes Rehearse, Record, Review with each Pre-, Take-, Post- Roll phase.
 - o Works only in conjunction with Nuendo.
 - o Nuendo 10.3.10 or Nuendo 11.0.20 required.
- VST Performer Mixer Channels can be renamed (within the Connect plugin or within the Performer application).
- New tracks that are created in the Nuendo/Cubase recording project via Get HD File functionality will be named according to the Mixer Channels in Performer.
- All Performer Mixer settings including Plugins and its Parameters are stored to the corresponding Nuendo/Cubase recording project and will be restored when re-connected to the corresponding project.

Improvements

- Get HD File transfer will be continued when re-connecting at the same point after the file transfer was stopped, either
 - o a) by purpose manually Stop the transfer or
 - o b) after a lost internet connection

Known situation and solution

“Share video” (Screen sharing) functionality does not seem to work

On macOS: open “System Preferences”, select “Security & Privacy”, select the tab “Privacy”, select the entry “Screen Recording”, activate “Nuendo 10” or “Nuendo 11” or “VST Connect Performer” to enable sharing the screen for that application.

Known Issue

If the Marker window is filtered to a dedicated Character for recording consecutive takes of that Character, the dialogue overlay for takes “inbetween” belonging to another Character might be visible.

VST Connect Pro 5.0.20.585

December 2020

This version contains the following improvements and issue resolutions.

Improvements

- The microphone in VST Connect Performer can now be temporarily switched off.
- A "Privacy" button has been added to VST Connect that shows the performer's privacy status.
- MIDI SysEx is now supported.
- A new user interface for "View settings" in the video area has been implemented.

Issues resolved

Area	Issue
Settings	The visual feedback of „View settings“ now works as expected (Windows only).
MIDI	MIDI Out selection now works for all selections.
MIDI	Fixed the limitation for usage of first MIDI Out device only.

VST Connect Pro 5.0.10.564

November 2020

This version contains the following improvements and issue resolutions.

Improvements

- 
- A large, light gray play button icon is positioned on the left side of the page, partially overlapping the "Improvements" section header. It consists of a right-pointing triangle inside a circle, with a thick gray arc behind it.
- Cycle playback for video streaming and local video playback in VST Connect Performer, as well as for the Timecode display are now supported.
 - A "delete" button has been added to VST Connect Pro to delete recordings in VST Connect Performer.
 - The Get HD files functionality has received many improvements.
 - A warning message will appear when switching off the device before the Get HD file transfer has finished.
 - Video streaming responsiveness has been improved.
 - A warning message will appear when the record enable button is switched off on the Master channel, so that no HD files are recorded.
 - Record status for channels has been added to VST Connect Performer.
 - The visibility for selected channel has been improved.
 - A toggle functionality for the "Open Editor" key command has been added to VST Connect Pro.

Issues resolved

Area	Issue
GetHD	Get HD files transfer of recordings from different connections now works as expected.
Performer	Fixed Performer green area in video section after launch.
Performer	The VST Connect Performer's window size is now saved when closing application.
Performer	On/Off button now works as expected for EQ, Compressor and Instrument in VST Connect Performer.
Video	Video track stream frame no longer intermittently drops first 2 seconds of playback.
Video	Fixed Performer wrong visibility of Video Load button.
Stability	Starting video playback several times from start of project no longer renders the application unreliable.
Stability	Closing VST Connect during login process no longer renders the application unreliable.
Stability	Removing a new recorded track in the VST Connect Manager no longer renders the application unreliable.
Other	Reset default values for parameters via ctrl+click now works as expected.
Other	Connect/Performer friendship request is now always approved.
Other	The "Open Editor" key command to open the VST Connect window now works as expected.
