

Welcome!

Congratulations and thank you for purchasing the Rupert Neve Designs Portico Plug-ins. In the history of the Yamaha Corporation, Rupert Neve Designs and Steinberg Media Technologies, the development of high-quality products to help people in music and media industries creating most exceptional results has always been fundamental.

In December 2010, Yamaha Corporation Japan and Yamaha Commercial Audio Systems Inc. announced a strategic partnership with Rupert Neve Designs, based on the joint goal to develop a close-to-reality digital reflection of the well-known Neve Portico 5033 EQ and 5043 Compressor / Limiter Duo hardware products, by using Yamaha's VCM technology. This unique technology easily surpasses every other modeling technology and therefore ideally fits into the philosophies of both companies to create products of superior quality.

Rupert Neve Designs has openly embraced Yamaha VCM technology as the first digital technology that offers a unique level of precision and modeling depth. It exactly reproduces the legendary analog circuitry and sound characteristics of Rupert Neve's hardware products, which have shaped the sound of a whole generation of audio engineers and producers.

The VCM technology is already successfully used in Yamaha's digital mixers and is at the same time the ideal basis to transfer the characteristic saturation of analog circuitry to the world of digital recording. Benefitting from Rupert Neve's experience in creating high-quality analog sounds, Yamaha's engineers have developed a perfect digital portrayal of RND's Portico 5033 EQ and 5043 Compressor / Limiter Duo hardware devices by transforming the legendary sound to the VST 3, VST 2.4 and AU plug-in format.

Combining Rupert Neve's knowledge in analog sound creation with Yamaha's excellence in digital engineering and Steinberg's long-term experience in software development, the Rupert Neve Designs Portico 5033 and 5043 mark the top of analog sound modeling, allowing you to experience the unique warmth and richness of the original Rupert Neve sound, which cannot be found in any other plug-in.

Activate your license

To activate your license, proceed as follows:

1. Open the eLicenser Control Center (which can be found in the Start menu on Windows systems or in the Applications folder on a Mac).
2. In the eLicenser Control Center, click the **"Enter Activation Code"** button.
You can also perform this step by selecting **Actions > Enter Activation Code**.
3. Enter your RND Portico 5033/5043 plug-in bundle or RND Portico 5033 EQ or RND Portico 5043 Compressor Activation Code, click "Continue" and follow the instructions.

The Activation Code can be found on the **"Essential Product License Information"** card (EPLI), which is supplied with the product package.

If you purchased the download version of the RND Portico 5033/5043 plug-in bundle or RND Portico 5033 EQ or RND Portico 5043 Compressor (e.g. through the Steinberg Online Shop), you will receive an e-mail with this Activation Code.

4. Congratulations! You have successfully licensed your product.

Register your software

We encourage you to register your software! By doing so, you are entitled to technical support and kept aware of updates and other news regarding the Rupert Neve Designs Plug-Ins.

Proceed as follows:

Go to **www.steinberg.net/mysteinberg**, log in to the exclusive MySteinberg online customer portal and register your product by following the instructions on screen.
